DISCUSSION

According to the Chinese Office Action, **Sato, EP'212** discloses that when a first access from an external apparatus occurs to an intelligent interconnecting device and the external apparatus is authenticated in authentication processing based on a TCP/IP protocol in the intelligent interconnecting device, the intelligent interconnecting device stores therein a source IP address of the external apparatus. When an access from an external apparatus occurs thereafter, a response to the access is permitted only when a source IP address of the external apparatus giving the access is identical with the source IP address stored in advance.

Pursuant to 37 CFR §1.97(d), the undersigned attorney hereby certifies that each item of information contained in this Information Disclosure Statement was cited in a communication from a foreign patent office in a counterpart foreign patent application not more than three (3) months prior to the filing of the statement.

The citation of the foregoing references is not intended to constitute an assertion that other or more relevant art does not exist. Accordingly, the Examiner is requested to make a wide-ranging and thorough search of the relevant art.

No fee is incurred by this Statement.

Respectfully submitted,
